

J V N SAI SHARATH

Frontend Engineer

☎ 9550616941 ✉ jsaisharath04@gmail.com 📁 portfolio 🌐 LinkedIn 🐙 GitHub 📍 Bangalore, India

PROFESSIONAL SUMMARY

Frontend Engineer with **4+ years of experience** building enterprise web applications across **fintech** and **SaaS** domains. Specializing in **React, Next.js, and TypeScript**, with expertise in **frontend architecture, micro-frontends, design systems, responsive design, and performance optimization**. Delivered scalable solutions serving **40+ enterprise clients** while improving engineering productivity, application performance, and user experience.

WORK EXPERIENCES

Software Development Engineer II (SDE-2) | Full-time

Zenstatement

May 2026 - Present

On-site • Bangalore

- Developing fintech web applications for cash reconciliation and billing workflows using **TypeScript, React Hook Form, Zod, and REST APIs**.
- Working on an **LLM-friendly design system** to improve **AI-assisted development workflows, component reusability, and design-to-code efficiency**.

Software Development Engineer I (SDE-1) | Full-time

Astuto.ai

Oct 2024 - Apr 2026

On-site • Bangalore

- Developed **responsive dashboards** and cost-management workflows for a multi-cloud analytics platform (**AWS, GCP, Azure**) used by **35+ enterprise customers**, integrating **RESTful APIs** and analytics capabilities to monitor and optimize cloud spending.
- Designed and maintained** a **component-driven design system** with **30+ reusable components, design tokens**, and Storybook documentation, standardizing UI patterns and **reducing feature development time by 25%**.
- Developed **35+ interactive Highcharts visualizations** and integrated **30+ APIs** using **React Query**, enabling near real-time cloud spend analysis with optimized data fetching and improved dashboard responsiveness.
- Architected scalable state management** using **Zustand** and React Context, improving maintainability for complex workflows while delivering **12 multi-step Formik/Zod forms** for critical cost-management operations.
- Improved application performance through **code splitting, lazy loading, memoization, and Vite optimization**, enhancing dashboard responsiveness and user experience across data-intensive workflows.

Software Development Engineer (Intern → Full-time SDE) | Full-time

ShopUp

Feb 2022 - Sep 2024

On-site • Bangalore

- Led frontend development** for **four internal fintech applications** supporting finance operations across multiple business units, streamlining reconciliation, budgeting, and cash management workflows.
- Built a Cash Reconciliation Tool using **Next.js** and **TypeScript**, integrating **RESTful APIs** and **Redux-based state management** to replace manual Excel workflows, enabling real-time synchronization and **eliminating duplicate data entry**.
- Owned a shared design system** adopted across **three internal products** and implemented **Jest-based unit testing**, improving UI consistency and reducing post-release defects.

SKILLS

Frameworks & Libraries :	React.js, Next.js, Redux Toolkit, Zustand, React Query, Formik, React Hook Form, Zod, Highcharts, Tailwind CSS
Programming Languages :	JavaScript (ES2023+), TypeScript, HTML5, CSS3, Python, SQL
Soft Skills :	Problem Solving, Decision Making, Leadership
Tools & Platforms :	Webpack, Vite, CI/CD, Git, Storybook, Jest, GitHub, Postman, GitHub Actions

EDUCATIONS

SASTRA University | Thanjavur

B.Tech – Computer Science & Engineering

Jul 2018 - Jun 2022

CGPA : 8.56/10
